Numerous Switching Configurations
Multiple Lamps/Ballast Configurations

Perfect For:

Adult Homes
Nursing Centers
Assisted Living
Rehabilitation Centers
Hospital Wards
Infirmaries

The ASL Over-Bedlite was designed using beautiful cast resin appliques. These appliques offer a timeless classic style of curlicues and Corinthian leafing that is sure to compliment any traditionally designed space. The moldings are hand-painted with a complimentary color and then glazed with an antiquating-agent to provide a tastefully distressed finish. They are then secured to the fixture using semi-hollow rivets to ensure long-lasting beauty.

Careful attention was paid to every detail in the design of the ASL Over-Bedlite. The fixture was engineered to be easy to install, easy to re-lamp, and easy to clean.

A touch-rail supported lens, makes re-lamping a snap with no tools needed. The lens simply lifts with simple fingertip pressure.
